Merchant Services

As your business evolves, so will your banking needs.

Merchant Services from Dime enables you to accept debit and credit card payments both in-store and online. Our competitive pricing and next-day funding can help simplify your operations without hindering your profitability.

Experience the benefits of Merchant Services.

- **Customer Vault**

Saving your customer's credit card details is a great way to speed up return visits. However, storing this sensitive information can expose you to increased liability if not handled properly. Dime's Customer Vault allows you to store payment methods without accessing the full credit card number, reducing security concerns while keeping customer information easily accessible.

- **iProcess**

Take your storefront with you wherever you go with iProcess, a simple and easy to use mobile app that allows you to take payments from anywhere using your personal iOS or Android phone. You can run a transaction, add tips, or even issue a refund using the app. And with full Customer Vault integration, you'll be able to save new credit cards, or pull up previously saved information right from your own mobile device.

- **Electronic Invoicing**

A simple, secure, and convenient way to bill your customers. Electronic invoicing enables merchants to invoice customers via brandable email and allows customers to make payments by following an embedded link. Electronic Invoicing allows you to invoice your customers via brandable emails which gives customers the ability to make payments by following a secure, embedded link.
